REMARKS

At the outset, Claim 40-43 have been copied from Claims 1, 7, 8 and 9 of U.S. Patent No. 6,347,885 for the purpose of provoking an interference.

Moreover, Claims 40-43 correspond to Claims 44-47 from parent application serial no. 10/040,117, which was the subject of a restriction requirement. Therefore, these claims were originally copied on April 2, 2002, within one year of the February 19, 2002 issue date of U.S. Patent No. 6,347,885 and thereby meeting the requirements of 35 U.S.C. §135(b).

It is believed that an interference should be declared on a count corresponding to Claim 40 hereinabove, which corresponds to the patent claim as identified above.

The claim is supported by the present specification, including drawings, as follows:

New Claims 40-43	Support in specification and drawings
40. A flexible, reclosable package comprising:	The bag 30 illustrated in Figure 25 and
	described from page 16, last line to page 17,
	line 7.
(a) first and second panel sections defining an	The bag 30 illustrated in Figure 25 has first and
interior;	second panel sections defining an interior.
(b) a zipper closure sealed to each of first and	Profiles 10, 12 of Figure 25.
second panel sections along a top edge, the	
zipper closure extending from a first side edge	
to a second side edge and comprising first and	, ,
second mating profiles;	
(c) a slider device constructed and arranged for	Slider 9 of Figure 25.
mounting on the zipper closure and for	
interlocking the first mating profile with the	·
second mating profile when the slider device is	
moved in a first direction and disengaging the	
first mating profile from the second mating	
profile when the slider device is moved in a	
second opposite direction; the slider device	
being operably mounted on the zipper closure;	
and	
(d) a first tamper-evident structure disposed at	The film extension 126 of Figure 25 forms a
the top edge and encasing a first portion of the	tamper-evident structure on the top edge of bag

zipper closure, the tamper-evident structure	30 which encases a portion of the zipper
having an opening exposing the slider device,	closure formed by profiles 10, 12. Leftmost
	side-cut 122 forms an opening which exposes
· ,	slider 9.
the opening defined by the tamper-evident	Left-most side-cut 122 of Figure 25 forms an
structure.	opening which provides access to slider 9 and
	is defined by the film extension 126. It is
	noted that col. 3, lines 60-63 of U.S. Patent No.
, .	6,347,885 (from which this claim was copied)
	states that "entirely defined" means "totally
	surrounded". Therefore, it follows that
	"defined" (as distinct from "entirely defined")
	encompasses "partially surrounded" (as distinct from "totally surrounded"). Further, this
	position is supported by the language of this
	claim regarding first and second panel sections
	defining an "interior" in that the interior is not
	"totally surrounded" by the panels when a
	mouth is formed in the package.
41. The package according to claim 40,	See claim 40 above.
wherein:	
(a) the slider device is positioned within the	Left-most side-cut 122 of Figure 25 forms an
opening of the first tamper-evident structure.	opening in film extension 126 in which slider 9
	is positioned.
42. The package according to claim 40, further comprising:	See claim 40 above.
(a) an area of weakness extending along the	The perforations 124 described on page 17,
first tamper-evident structure.	lines 5-7, and shown on Figure 25 form an
	"area of weakness".
43. The package according to claim 42, wherein:	See claim 42 above.
(a) the area of weakness is a perforation line.	The perforations 124 described on page 17,
	lines 5-7, and shown on Figure 25 form a
	"perforation line".

Applicant's effective filing date is earlier than the filing date of U.S. Patent No. 6,347,885.

The Commissioner is authorized to charge any necessary fees to Deposit Account No. 50-1145, Order No. 500769.106073.

Respectfully submitted,

Gerald Levy
